| COFFIN NAME | DESCRIPTION | PRICE |
|---|---|--------------------------------------|
| Natural Coloured Wool Coffin | The woollen coffin is handmade in Yorkshire using pure new British wool, supported on a strong recycled cardboard frame. Wool is a fibre with a true 'green' lineage that is both sustainable and biodegradable. <i>(Rustic also available – price on request)</i> | £950 |
| Water Hyacinth Coffin | One of the fastest growing aquatic plants known, sometimes called 'golden plant', it can double its population in two weeks. Water hyacinth forms a dense impenetrable mat across the water surface, limiting access by man, animals are obstructed, and irrigation and drainage systems become blocked. Harvesting water hyacinth for constructing this coffin has great local benefits in clearing water courses and providing irrigation etc. The resulting materials, when woven, produce a beautiful looking coffin. This coffin is accredited with Fair Trade status. | £910 |
| Handwoven Highsted Willow Coffin | Our willow coffins are hand-made by a co-operative of cottage industries in Poland. They are accredited with Fair Trade status. The coffins are designed to slot into one another, hence transporting one coffin to the UK from Poland uses no more fuel than a 2 mile car journey. | <i>Highsted</i> £810 |
| Handwoven Cromer Willow Coffin | | <i>Cromer</i> £805 |
| Pandanus Coffin | The Pandanus coffin is made from wild pineapple leaf in Indonesia, an environmentally friendly alternative to seagrass. Seagrass provides shelter to many varieties of nursery fish. It is currently under threat from coastal development, dredging and urban expansion. Pandanus on the other hand grows rapidly on land even in adverse conditions. When woven it is almost indistinguishable from seagrass. This coffin is accredited with Fair Trade status and is suitable for burial only. | £685 |
| Handwoven Bamboo Lattice Design | Our bamboo coffins are hand-made in China from material grown and cropped in licensed plantations. Pandas do not eat the species of bamboo used in these coffins. These coffins are accredited with Fair Trade status. | <i>Lattice Design</i> £605 |
| Handwoven Bamboo Eco Coffin | | <i>Eco</i> £550 |
| Elvedon Cardboard Coffin | This ecological coffin incorporates advanced design techniques and uses the highest quality cardboard. This coffin is made from 100% biodegradable materials, including UV water-based paints. Available in green, brown, woodgrain or marble effect (<i>all with handles</i>). Other designs, themes or styles are possible and the coffin can be personalised to your own wishes. Please ask for details. | £422 |

These coffins are all suitable for burial or cremation, unless otherwise stated.
If you would like to provide your own coffin, we charge a handling fee of £100.
